

Vitaflo™ USA Product Guide

Vitaflo is at the forefront of developing innovative specialized medical foods for Inherited Metabolic Diseases, Kidney Disease, and the medical Ketogenic Diet. Our aim is to create nutritional products that combine cutting-edge research with the lifestyle demands of modern living, ensuring the most acceptable products are available for nutrition management.

By constantly evolving to meet the nutrition needs of people with rare conditions, **Vitaflo** will continue to develop products which offer choice, flexibility and convenience to support a sustainable therapeutic diet.

Claim support

Product access

Enrollment is simple.

1 Fill out the [Online Enrollment Form](#) or download the [Enrollment Form](#) at VitafloUSA.com/Formula4Success for your formula needs.
For Spanish speakers: [Spanish Enrollment Form](#)

- 2 Patients should work with the healthcare professional to complete the form*, sign the **patient privacy statement**, and include a front and back copy of all active health insurance cards
- 3 Email Formula4Success@VitafloUSA.com or fax the completed form and documents** to **888-485-7193**

* All fields must be filled out to complete the enrollment process.

** You can click [here](#) to access the Detailed Written Order (DWO) and [here](#) for Letters of Medical Necessity (LOMN) templates, or download them at VitafloUSA.com/Formula4Success then send them via email along with recent and/or relevant clinical notes and labs to the **Formula4Success** team.

Fruitivits and Single Dose Amino Acids are not eligible for **Formula4Success**.

startTM

Amino Acid-based Powdered Phenylalanine-free Infant Formula with Iron for use in the dietary management of Phenylketonuria (PKU) for infants and toddlers.

Features

- Suitable for infants and toddlers
- Up-to-date nutritional profile: Containing all essential vitamins and minerals
 - Consistent with scientific evidence in infant formula nutrition¹⁻³ and PKU management⁴
 - Includes DHA and ARA to help support brain and eye development^{5,6}
- Well tolerated: Infants with PKU demonstrate good tolerance, growth, and metabolic control in clinical evaluations⁷

Osmolality

435 mOsm/kg

Osmolarity

393 mOsm/L

See page 99 for directions for use

exploreTM5

A powdered phenylalanine-free medical food for use in the dietary management of Phenylketonuria.

Features

- Suitable from 6 months of age
- A blend of essential and non-essential amino acids, carbohydrate, arachidonic acid (ARA), docosahexaenoic acid (DHA), vitamins and minerals
- 1 packet provides 5 g protein equivalent
- Designed to form a semi-solid (spoonable) consistency when mixed with water to support introduction of solids in the PKU diet
- Available in Unflavored

See [page 100](#) for directions for use

Ordering/Reimbursement Information

Flavor	Packaging	Reimbursement Code	HCPCS Code	Product Code
Unflavored	30 x 12.5 g packets	12539-0024-65	B4157 & B4162	812539024651

PKU explore5 (Unflavored) — Ingredients: Sugar, L-Lysine L-Aspartate, Corn Starch, Modified Corn Starch, L-Leucine, L-Tyrosine, Glycine, L-Arginine Aspartate, L-Glutamine, L-Valine, L-Proline, L-Threonine, L-Isoleucine, Dried Glucose Syrup, Calcium Phosphate, L-Serine, L-Alanine, L-Histidine, Choline Bitartrate, L-Cystine, Magnesium Phosphate, L-Tryptophan, Potassium Chloride, L-Methionine, L-Arginine, High Oleic Sunflower Oil, Refined Tuna Oil (Fish), Calcium Glycerophosphate, Maltodextrin, Sodium Citrate, Sodium Ascorbate, M. Alpina Oil*, Salt, Taurine, Zinc Gluconate, L-Carnitine L-Tartrate, Potassium Phosphate, Ferrous Sulfate, Mono- and Diglycerides, DL-Alpha Tocopherol Acetate, Vitamin D3, Calcium Pantothenate, Niacinamide, Sodium Selenite, Copper Gluconate, Retinyl Acetate, Vitamin B12, Chromium Chloride, Folic Acid, Biotin, Potassium Iodide, Manganese Gluconate, Riboflavin, Pyridoxine Hydrochloride, Thiamine Hydrochloride, Sodium Molybdate, Vitamin K1, Tocopherols, Ascorbyl Palmitate.

Contains: Fish (tuna). **May contain:** Milk.

*A source of arachidonic acid (ARA).

Ready-to-drink low Phenylalanine Medical Food for use in the dietary management of Phenylketonuria.

Features

- Suitable for ages 1 year and over
- A blend of whey protein isolate (glycomacropeptide – GMP), essential and non-essential amino acids, carbohydrate, fat (including docosahexaenoic acid – DHA), vitamins and minerals.
- 1 bottle provides 15 g protein equivalent from GMP and amino acids
- Available in Creamy, Neutral flavor
- Each bottle of **PKU sphere NEXT15** contains 23 mg of phenylalanine.

Osmolality

640 mOsm/kg

See page 103 for directions for use

Ordering/Reimbursement Information

Flavor	Packaging	Reimbursement Code	HCPGS Code	Product Code
Neutral	15 x 180 mL	12539-0026-00	B4157 & B4162	26006

PKU sphere™ NEXT15 (Neutral) — Ingredients: Water, Casein glycomacropeptide (milk), Sugar, Vegetable oils (High oleic sunflower oil, Canola oil). Contains 2% or less of: L-leucine, L-tyrosine, Calcium phosphate, Citric acid esters of mono- and diglycerides, Mono and diglycerides of fatty acids, Natural flavors, Magnesium acetate, L-arginine, L-histidine, Glycine, Choline bitartrate, L-tryptophan, Xanthan gum, L-cystine, Schizochytrium sp. oil*, Ascorbic acid, Potassium hydroxide, Zinc gluconate, Taurine, L-carnitine L-tartrate, Ferrous sulfate, L-methionine, Vitamin D3, DL-alpha tocopheryl acetate, Copper gluconate, Niacinamide, Retinyl Acetate, Manganese gluconate, Pantethenic acid, Sodium selenite, Vitamin K1, Biotin, Vitamin B12, Folic acid, Potassium iodide, Thiamine hydrochloride, Chromium chloride, Vitamin B6, Riboflavin, Sodium molybdate, Ascorbyl palmitate and Tocopherols (preservatives).

Contains: Milk.

*A source of docosahexaenoic acid (DHA).

Return to table of contents

A powdered isoleucine, leucine, and valine-free medical food for use in the dietary management of Maple Syrup Urine Disease.

Features

- Suitable from 1 year of age
- A blend of essential and non-essential amino acids, carbohydrate, vitamins and minerals
- 1 packet provides 10 g protein equivalent
- Designed to form a semi-solid (spoonable) consistency when mixed with water, or a low volume drink when mixed with water or other permitted beverage
- Available in Unflavored

Osmolality

24 g (1 packet) + 30 ml (1 fl oz) water = 3000 mOsm/kg

24 g (1 packet) + 80 ml (2.7 fl oz) water = 1540 mOsm/kg

See page 102 for directions for use

express™15 plus⁺

A powdered isoleucine-, leucine-, and valine-free medical food for use in the dietary management of Maple Syrup Urine Disease.

Features

- Suitable from 3 years of age
- A blend of essential and non-essential amino acids, carbohydrate, docosahexaenoic acid (DHA), vitamins and minerals
- 1 packet provides 15 g protein equivalent
- Designed to be mixed with water or other permitted beverages to prepare a low volume drink
- Available in Unflavored

Osmolality

25 g (1 packet) + 90 ml (3 fl oz) water = 1705 mOsm/kg

See page 106 for directions for use

Return to table of contents

A powdered phenylalanine and tyrosine-free medical food for use in the dietary management of Tyrosinemia.

Features

- Suitable from 1 year of age
- A blend of essential and non-essential amino acids, carbohydrate, vitamins and minerals
- 1 packet provides 10 g protein equivalent
- Designed to form a semi-solid (spoonable) consistency when mixed with water, or a low volume drink when mixed with water or other permitted beverage
- Available in Unflavored

Osmolality

24 g (1 packet) + 30 ml (1 fl oz) water = 3000 mOsm/kg

24 g (1 packet) + 80 ml (2.7 fl oz) water = 1540 mOsm/kg

See page 102 for directions for use

sphere[®]

A powdered glycomacopeptide (GMP)-based low phenylalanine* and tyrosine* medical food for use in the dietary management of Tyrosinemia.

Features

- Suitable from 3 years of age
- A blend of glycomacopeptide (GMP), essential and non-essential amino acids, carbohydrate, fat (including docosahexaenoic acid – DHA), vitamins and minerals
- 1 packet provides 20 g protein equivalent from GMP and amino acids
- Available in Red Berry and Vanilla flavors

*Each packet of TYR sphere20 contains 30 mg of phenylalanine and less than 10.5 mg of tyrosine.

Osmolality

27 g (1 packet) + 120 ml (4 fl oz) water = 1000 mOsm/kg

See [page 105](#) for directions for use

express™15 plus⁺

A powdered phenylalanine-free and tyrosine-medical food for use in the dietary management of Tyrosinemia.

Features

- Suitable from 3 years of age
- A blend of essential and non-essential amino acids, carbohydrate, docosahexaenoic acid (DHA), vitamins and minerals
- 1 packet provides 15 g protein equivalent
- Designed to be mixed with water or other permitted beverages to prepare a low volume drink
- Available in Unflavored

Osmolality

25 g (1 packet) + 90 ml (3 fl oz) water = 1705 mOsm/kg

See page 106 for directions for use

Ordering/Reimbursement Information

Flavor	Packaging	Reimbursement Code	HCPGS Code	Product Code
Unflavored	30 x 25 g packets	12539-0024-95	B4157 & B4162	812539024958

TYR express plus15 (Unflavored) – Ingredients: L-Lysine L-Aspartate, L-Leucine, Maltodextrin, L-Arginine L-Aspartate, L-Valine, L-Glutamine, L-Isoleucine, L-Proline, L-Alanine, Glycine, L-Threonine, L-Serine, Calcium Phosphate, Corn Starch, L-Histidine, Corn Syrup, Magnesium Phosphate, Refined Tuna Oil (Fish)*, L-Cystine, Potassium Citrate, Choline Bitartrate, L-Tryptophan, L-Methionine, L-Arginine, Modified Corn Starch, Sodium Chloride, Sodium Citrate, Xanthan Gum, Sodium Ascorbate, Soy Lecithin, Taurine, Zinc Gluconate, L-Carnitine L-Tartrate, Potassium Phosphate, Ferrous Sulfate, DL-Alpha Tocopherol Acetate, Mono- and Diglycerides, Ascorbic Acid, Sodium Selenite, Copper Gluconate, Vitamin D3, Manganese Gluconate, Niacinamide, Vitamin A Acetate, Calcium Pantothenate, Chromium Chloride, Vitamin B12, Biotin, Tocopherols (Preservative), Pyridoxine Hydrochloride, Potassium Iodide, Folic Acid, Thiamine Hydrochloride, Riboflavin, Sodium Molybdate, Vitamin K1.

Contains: Fish (tuna) and Soy. **May contain:** Milk.

*A source of docosahexaenoic acid (DHA).

*No added methionine.

A ready-to-drink methionine-free medical food for use in the dietary management of Homocystinuria.

Features

- Suitable from 3 years of age
- A blend of essential and non-essential amino acids, carbohydrate, vitamins, minerals, and docosahexaenoic acid (DHA)
- 1 pouch provides 15 g protein equivalent
- Available in Orange and Red flavors

Osmolality

1550 mOsm/kg

See page 107 for directions for use

Return to table of contents

A powdered methionine-, threonine-, valine-free, and low isoleucine medical food for use in the dietary management of Methylmalonic Acidemia and Propionic Acidemia.

Features

- Suitable from 1 year of age
- A blend of essential and non-essential amino acids, carbohydrate, vitamins and minerals
- 1 packet provides 10 g protein equivalent
- Designed to form a semi-solid (spoonable) consistency when mixed with water, or a low volume drink when mixed with water or other permitted beverage
- Available in Unflavored

Osmolality

24 g (1 packet) + 30 ml (1 fl oz) water = 3000 mOsm/kg

24 g (1 packet) + 80 ml (2.7 fl oz) water = 1540 mOsm/kg

See page 102 for directions for use

[Return to table of contents](#)

A powdered essential amino acid medical food for the dietary management of Urea Cycle Disorders.

Features

- Suitable from 1 year of age
- A blend of essential amino acids, carbohydrate, fat (including docosahexaenoic acid – DHA), vitamins and minerals
- 2 level scoops (33 g) provide 5 g protein equivalent
- Available in Unflavored

Osmolarity

33 g (2 scoops) + 120 ml (4 fl oz) water = 661 mOsm/kg

See page 109 for directions for use

Ordering/Reimbursement Information

Flavor	Packaging	Reimbursement Code	HCPCS Code	Product Code
Unflavored	6 x 400 g can	60014-0051-82	B4157 & B4162	5060014051820

UCD trio (Unflavored) — Ingredients: Dried Glucose Syrup, Blend of Vegetable Oils (High Oleic Sunflower Oil, Soybean Oil), Sugar, L-Leucine, Calcium Phosphate, L-Lysine Acetate, L-Valine, L-Isoleucine, and less than 2% of: Sodium Citrate, Potassium Chloride, L-Threonine, Magnesium Hydrogen Phosphate, L-Tyrosine, Choline Bitartrate, L-Phenylalanine, L-Methionine, L-Histidine, Schizochytrium Sp. Oil*, L-Cysteine, Maltodextrin, L-Tryptophan, Citric Acid Esters of Mono and Diglycerides of Fatty Acids, Xanthan Gum, Magnesium Acetate, L-Ascorbic Acid, Zinc Gluconate, Sodium Caseinate (Milk), Inositol, Taurine, Sodium Ascorbate, Ferrous Sulfate, L-Carnitine L-Tartrate, DL-Alpha Tocopherol Acetate, Potassium Phosphate, Manganese Gluconate, Mono and Diglycerides of Fatty Acids, Niacinamide, Copper Gluconate, Retinyl Acetate, Calcium Pantothenate, Pyridoxine Hydrochloride, Thiamine Hydrochloride, Riboflavin, Folic Acid, Chromium Chloride, Potassium Iodide, Sodium Molybdate, Sodium Selenite, Biotin, Vitamin K1, Vitamin D3, Vitamin B12, Tocopherol (Preservative), Ascorbyl Palmitate (Preservative).

Contains: Milk.

*A source of docosahexaenoic acid (DHA).

A powdered essential amino acid medical food for the dietary management of Urea Cycle Disorders.

Features

- Suitable from 3 years of age
- A blend of essential amino acids, carbohydrate, docosahexaenoic acid (DHA), vitamins and minerals
- 1 packet contains 5 g protein equivalent
- Designed to be mixed with water or other permitted beverages to a low volume drink
- Available in Tropical flavor

Osmolality

12.5 g (1 packet) + 100 ml (3 fl oz) water = 647 mOsm/kg

See page 110 for directions for use

A powdered formula containing whey protein, carbohydrate, fat (high in medium chain triglycerides [MCT], low in long chain triglycerides [LCT]), vitamins, minerals, DHA and ARA.

Features

- Suitable from 1 year of age
- For use in the dietary management of long chain fatty acid oxidation disorders, fat malabsorption, and other disorders requiring a high MCT, low LCT formula
- 99% of protein from whey
- Can be used as oral supplement or tube feeding
- Neutral taste (Unflavored)

Osmolality

20 kcal/fl oz (0.67 kcal/ml) dilution:

5 g powder (1 scoop) + 30 ml (1 fl oz) water = 180 mOsm/kg

See page 111 for directions for use

A medium chain triglyceride-based powder, containing a blend of carbohydrate and protein.

Features

- Suitable from 3 years of age
- For the dietary management of disorders of long chain fatty acid oxidation, fat malabsorption and other disorders requiring a high MCT, low long chain triglyceride (LCT) diet
- MCTprocal can be added to a wide variety of foods and drinks*
- May be used to fortify enteral formula with a source of MCT
- Neutral taste (Unflavored)

* not suitable for addition to fruit juice

See page 112 for directions for use

MCTprocal — Ingredients: Medium Chain Triglycerides (from Coconut and Palm Kernel Oil), Glucose Syrup, Sodium Caseinate (milk), Dipotassium Phosphate, Calcium Phosphate.

Contains: Milk.

A hydrothermally processed high amylopectin cornstarch. For use in the dietary management of hepatic Glycogen Storage Diseases (GSD) where the use of a long acting cornstarch is indicated.

Features

- Suitable from 5 years of age
- Specialized patented heat and moisture process for slower release starch
- Glycosade can be taken as a drink or given as a bolus via feeding tube
- Available in Unflavored and Lemon flavor

Osmolality

Unflavored: 60 g (1 packet) + 120 ml (4 fl oz) water = 14 mOsm/kg

Lemon flavor: 60 g (1 packet) + 120 ml (4 fl oz) water = 19 mOsm/kg

See page 113 for directions for use

Unflavored — Ingredient: Cornstarch.

Lemon (artificially flavored) — Ingredients: Cornstarch, Natural and Artificial Flavor, Xanthan Gum, Citric Acid, Sucralose.

A powdered neutral tasting carbohydrate drink mix specifically formulated for use as an emergency regimen in the dietary management of inherited metabolic diseases.

Features

- Age indication*:
- S.O.S25 is recommended from 10 years of age
*can vary depending on individual requirements
- Pre-measured amounts of carbohydrate
- Use 1 full packet and add sufficient water to achieve a final volume of 200 ml:
- S.O.S25 = 25% CHO solution
- Neutral taste (Unflavored)

Osmolality

52 g of S.O.S25 + water to a final volume of 200 ml = 390 mOsm/kg

See page 114 for directions for use

Valine50 — Ingredients: Dried Glucose Syrup, L-Valine.

KIDNEY DISEASE

A powdered formula with low levels of protein, calcium, chloride, potassium, phosphorus and vitamin A, for the dietary management of pediatric kidney disease.

Features

- Suitable from 1 year of age
- A blend of whey protein, carbohydrate, fat (including docosahexaenoic acid – DHA and arachidonic acid – ARA), vitamins, minerals, and low levels of renal specific nutrients
- Can be concentrated to provide up to 2 kcal/ml
- Suitable for oral and tube feeding use
- Neutral taste (Unflavored) to allow for mixing with other formulas and supplements

Osmolality

30 kcal/fl oz (1 kcal/ml) dilution:

7 g powder (1 scoop) + 30 ml (1 fl oz) water = 230 mOsm/kg

Potential renal solute load = 125 mOsm/L

See page 121 for directions for use

Ordering/Reimbursement Information

KETOGENIC

**Ready-to-drink nutritionally complete
ketogenic formula in a 4:1 ratio of fat to
carbohydrate and protein; for use in the
dietary management of intractable epilepsy
and other medical conditions where a
ketogenic diet is indicated.**

Features

- Suitable from 3 years of age
- Can be used as a sole source of nutrition or an oral supplement in combination with foods as part of a medical ketogenic diet
- Suitable for tube and oral feeding use
- Provides IS50™ fiber blend supporting digestive health with 3.2 g fiber per bottle
- Available in Vanilla flavor

Osmolality

290 mOsm/kg

See page 125 for directions for use

A ready-to-use liquid emulsion of medium chain triglycerides (MCT) for use in the ketogenic diet or in the dietary management of conditions requiring MCT.

Features

- Suitable from 1 year of age
- 20% MCT emulsion in a 7.6 fl oz (225 ml) bottle
- Can be incorporated into cooking and baking recipes
- May be used to fortify enteral formula with a source of MCT
- Available in Unflavored

Osmolality

50 mOsm/kg

See page 126 for directions for use

METABOLIC PRODUCTS: DIRECTIONS FOR USE

For more information on PKU start, see page 3

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight, and medical condition of the patient.

Important Notice

PKU start must only be consumed by individuals with proven Phenylketonuria in conjunction with human milk or infant formula to provide the phenylalanine, fluid and general nutritional requirements of the infant in quantities as advised by a clinician or dietitian.

Suitable for infants and toddlers.

Not for intravenous use.

For enteral use only.

Not for use as a sole source of nutrition.

Preparation guidelines

The standard dilution of 21 kcal/fl oz or 0.69 kcal/ml is made by adding 1 level scoop of PKU start (4.7 g) to 30 ml (1 fl oz) of water. Use only the scoop provided in the can or a gram scale for greatest accuracy.

Storage

Store opened and unopened cans in a cool dry place.

Once opened: Tightly cover open can and use within 3 weeks. Avoid extreme storage temperatures.

Pack Size

4 x 400 g cans

Preparation Guidelines

Pour prescribed amount of water into bottle.

Add the prescribed number of level scoops to the water.

Close the bottle; shake well. Feed infant or toddler immediately. Once feeding begins, use contents within 1 hour or discard.

For more information on PKU explore, see page 5

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on age, body weight and medical condition of the patient.

Each 12.5 g packet of PKU explore provides 5 g protein equivalent.

Each 25 g packet of PKU explore provides 10 g protein equivalent.

Important Notice

Must only be consumed by people with proven Phenylketonuria under strict medical supervision.

PKU explore5 is suitable from 6 months of age.

PKU explore10 is suitable from 1 year of age.

Diet must be supplemented with natural protein, water and other nutrients in prescribed quantities to supply phenylalanine, fluid, and general nutrition requirements.

Not for intravenous use.

For enteral use only.

Not for use as a sole source of nutrition.

Not intended for use as a human milk substitute.

Preparation Guidelines

Water or permitted drinks should be taken after product consumption. The product should be prepared immediately prior to feeding and any remaining product must be discarded if not used within 1 hour.

Water or permitted drinks should be taken after product consumption.

Storage

Store in a cool dry place.

Packets are designed for single use and should be used immediately once opened.

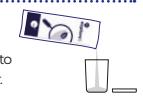

Pack Size

explore5 – 30 x 12.5 g (0.44 oz) packets
explore10 – 30 x 25 g (0.88 oz) packets

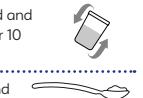

Preparation Guidelines

To prepare PKU explore5 as a spoonable consistency:

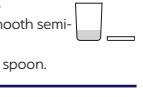

- 1 For PKU explore5, add 12.5 ml (approx. 1 Tbsp) of cold water into a small container with a lid.
- 2 For PKU explore10, add 25 ml (1.5–2 Tbsp) of cold water into a small container with a lid.

- 3 Empty the contents of the packet into the container.
- 4 Secure the lid and shake well for 10 seconds.

- 5 Leave to stand for 2 minutes, allowing a smooth semi-solid consistency to form. Consume with a spoon.

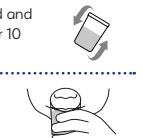

To prepare PKU explore10 as a low volume drink:

- 1 Add 80 ml (approx. 3 fl oz) of cold water into a small container with a lid.
- 2 Empty the contents of the packet into the container.
- 3 Secure the lid and shake well for 10 seconds.

- 4 Drink immediately.

For more information on PKU trio, see page 9

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on age, body weight, and medical condition of the patient.

2 level scoops provide 10 g protein equivalent.

Important Notice

Must only be consumed by people with proven Phenylketonuria under strict medical supervision.

Suitable from 1 year of age.

Diet must be supplemented with natural protein, water and other nutrients in prescribed quantities to supply the phenylalanine, fluid, and general nutrition requirements.

Not for intravenous use.

For enteral use only.

Not for use as a sole source of nutrition.

Storage

Unopened: PKU trio should be stored in a cool dry place.

Once opened: Use within 1 month.

Any prepared product or formula should be refrigerated and used within 24 hours. Re-shake before use.

Pack Size

400 g (14.11 oz) can

Preparation Guidelines

To prepare 10 g PE:

Measure
2 level
scoops
into glass/
mixing cup.

1

Add approx.
135 ml
(4.5 fl oz) of
cold water.

2

Mix well
until all of
the powder
is dissolved.

3

Drink
immediately.

4

For more information on gel products see pages 31, 39, 49, 57, and 63

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on age, body weight and medical condition of the patient.

Each packet of gel provides 10 g protein equivalent.

Important Notice

Must only be consumed by people with a proven metabolic disorder under strict medical supervision.

Suitable from 1 year of age.

Diet must be supplemented with natural protein, water and other nutrients in prescribed quantities to supply the restricted amino acids, fluid, and general nutrition requirements.

Not for intravenous use.

For enteral use only.

Not for use as a sole source of nutrition.

Preparation Guidelines

Preparation Guidelines

To prepare a spoonable consistency

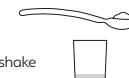

1
Add 30 ml (1 fl oz)
of cold water into
a small container
with a lid.

2
Empty the contents of the
packet into the container.

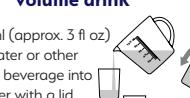

3
Secure the lid and shake
well for 10 seconds.

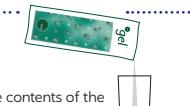

Leave to stand for 2 minutes, allowing a smooth semi-solid consistency to form.
Consume with a spoon.

To prepare a low volume drink

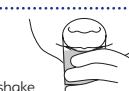

1
Add 80 ml (approx. 3 fl oz)
of cold water or other
permitted beverage into
a container with a lid.

2
Empty the contents of the
packet into the container.

3
Secure the lid and shake
well until powder dissolves.
Drink immediately.

For more information on PKU sphere NEXT15, see page 11

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight, and medical condition of the patient.

Each 180 mL (6 fl oz) bottle of **PKU sphere NEXT15** provides 15 g of Protein Equivalent and contains 23 mg of phenylalanine.

Preparation Guidelines

Shake vigorously before use. If desired, refrigerate before use.

Important Notice

Must only be consumed by people with proven PKU under strict medical supervision.

Diet must be supplemented with natural protein, water, and other nutrients in prescribed quantities to supply phenylalanine, fluid, and general nutrition requirements.

Not for intravenous use. For enteral use (oral and tube feeding). Not for use as a sole source of nutrition.

Storage

Store in a cool dry place or refrigerate before use if desired.

The product should be consumed immediately after opening.

However, if this is not possible, seal cap and consume within 6 hours at room temperature or within 24 hours if refrigerated.

Re-shake well before use to avoid separation.

Pack Size

15 x 180 ml (6 fl oz) bottles

For more information on PKU sphere liquid, see page 13

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight, and medical condition of the patient.

Each 8 fl oz (237 ml) carton of PKU sphere20 liquid provides 20 g of protein equivalent and contains 30 mg of phenylalanine.

Important Notice

Must only be consumed by people with proven PKU under strict medical supervision.

Suitable from 3 years of age.

Diet must be supplemented with natural protein, water, and other nutrients in prescribed quantities to supply phenylalanine, fluid, and general nutrition requirements.

Not for intravenous use.

For enteral use only (tube or oral).

Not for use as a sole source of nutrition.

Storage

Store in a cool dry place or refrigerate before use if desired.

The product should be consumed immediately after opening. However, if this is not possible, seal cap and consume within 4 hours at room temperature or within 24 hours if refrigerated. Re-shake well before use.

Pack Size

15 x 237 ml (8 fl oz) cartons

For more information on sphere products, see pages 15–17 and 41

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight and medical condition of the patient.

Each packet of sphere15 provides 15 g protein equivalent and contains 23 mg of phenylalanine.

Each packet of sphere20 provides 20 g protein equivalent and contains 30 mg of phenylalanine.

Important Notice

Must only be consumed by people with a proven metabolic disorder under strict medical supervision.

Suitable from 3 years of age.

Diet must be supplemented with natural protein, water, and other nutrients in prescribed quantities to supply restricted amino acids, fluid, and general nutrition requirements.

Not for intravenous use.

For enteral use only.

Not for use as a sole source of nutrition.

Storage

Store in a cool dry place.

The product should be freshly prepared and consumed immediately.

If this is not possible, all prepared products must be tightly covered and consumed within 4 hours at room temperature or within 24 hours if refrigerated.

Pack Size

sphere15: 30 x 27 g (0.95 oz) packets

sphere20: 30 x 35 g (1.23 oz) packets

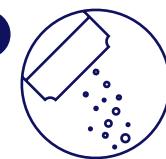

Preparation Guidelines

1

Measure 120 ml (4 fl oz) of water into a cup with a lid.

2

Add one packet of sphere.

3

Secure lid and shake well until the powder is fully dissolved.

For best results the product should be freshly prepared and used immediately. Water or permitted drinks should be taken after product consumption.

For more information on express plus products, see pages 19, 21, 33, 35, 43, 45, 51, 53, 59, and 65

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on age, body weight and medical condition of the patient.

Each packet of express plus15 provides 15 g protein equivalent.

Each packet of express plus20 provides 20 g protein equivalent.

Important Notice

Must only be consumed by people with a proven metabolic disorder under strict medical supervision.

Suitable from 3 years of age.

Diet must be supplemented with natural protein, water and other nutrients in prescribed quantities to supply the restricted amino acids, fluid and general nutrition requirements.

Not for intravenous use.

For enteral use only.

Not for use as a sole source of nutrition.

Storage

Store in a cool dry place. Packets are designed for single use and should be used immediately once opened. Any unused powder in a packet must be tightly sealed and used within 24 hours.

Pack Size

express15 – 30 x 25 g (0.88 oz) packets

express20 – 30 x 34 g (1.2 oz) packets

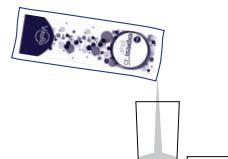

Preparation Guidelines

1

Add 90 ml (3 fl oz) of cold water or other permitted beverages into a cup with a lid.

2

Empty the contents of the packet into the cup.

3

Secure the lid and shake well for 10 seconds until powder dissolves. Drink immediately.

The product should be freshly prepared and used immediately.

Water or permitted drinks should be taken after product consumption.

For more information on cooler products,
see pages 23–28, 37, 47, 55 and 61

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on age, body, weight and medical condition of the patient.

Each cooler10 pouch provides 10 g protein equivalent.

Each cooler15 pouch provides 15 g protein equivalent.

Each cooler20 pouch provides 20 g protein equivalent.

Important Notice

Must only be consumed by people with a proven metabolic disorder under strict medical supervision.

Suitable from 3 years of age.

Diet must be supplemented with natural protein, water and other nutrients in prescribed quantities to supply the restricted amino acids, fluid and general nutrition requirements.

Not for intravenous use.

For enteral use only.

Not for use as a sole source of nutrition.

Storage

Store in a cool dry place.

Once opened drink immediately or recap, refrigerate and use within 24 hours.

Pack Size

cooler10 – 30 x 87 ml (2.94 fl oz) pouches

cooler15 – 30 x 130 ml (4.39 fl oz) pouches

cooler20 – 30 x 174 ml (5.88 fl oz) pouches

For more information on PKU air, see page 29

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight, and medical condition of the patient.

Each pouch of PKU air20 provides 20 g protein equivalent.

Important Notice

Must only be consumed by people with proven Phenylketonuria under strict medical supervision.

Suitable from 3 years of age.

Diet must be supplemented with natural protein, water, and other nutrients in prescribed quantities to supply phenylalanine, fluid, and general nutrition requirements.

Not for intravenous use.

For enteral use only.

Not for use as a sole source of nutrition.

Storage

Store in a cool dry place.

Once opened drink immediately or recap, refrigerate and use within 24 hours.

Pack Size

30 x 174 ml (5.88 fl oz) pouches

Preparation Guidelines

- 1** Shake well
- 2** Open
- 3** Drink

Shake well before use.
Best served chilled.
Water or permitted drinks should be taken after product consumption.

Preparation Guidelines

- 1** Shake well
- 2** Open
- 3** Drink

Shake well before use.
Best served chilled.
Water or permitted drinks should be taken after product consumption.

For more information on UCD trio, see page 67

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on age, body weight and medical condition of the patient.

2 level scoops provide 5 g protein equivalent.

Important Notice

Must only be consumed by people with proven Urea Cycle Disorders and other disorders where the use of essential amino acids is indicated under strict medical supervision.

Diet must be supplemented with natural protein, water, and other nutrients in prescribed quantities to meet fluid and general nutrition requirements.

Suitable from 1 year of age.

Not for intravenous use.

For enteral use only.

Not for use as sole source of nutrition.

Storage

Unopened: UCD trio should be stored in a cool dry place.

Once opened: Use within 1 month.

The product should be freshly prepared and consumed immediately. If this is not possible, all prepared products must be tightly covered and consumed within 4 hours at room temperature or within 24 hours if refrigerated.

Pack Size

400 g (14.11 oz) can

Preparation Guidelines

To prepare 5 g PE:

Measure 120 ml (4 fl oz) of cold water into a cup with a lid.

1

Add 2 level scoops of UCO trio.

2

Secure the lid and shake until the powder is fully dissolved.

3

UCD trio is now ready to use.

4

For more information on EAA Supplement, see page 69

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on age, body weight and medical condition of the patient.

Each packet of EAA provides 5 g protein equivalent.

Important Notice

Must only be consumed by people with proven Urea Cycle Disorders or other disorders of protein metabolism under strict medical supervision.

Suitable from 3 years of age.

Not for intravenous use.

For enteral use only.

Not for use as a sole source of nutrition.

Storage

Store in a cool dry place.
Packets are designed for single use and should be used once opened.

Pack Size

30 x 12.5 g (0.44 oz) packets

Preparation Guidelines

1

Add 90 ml (approx. 3 fl oz) of cold water or other permitted beverages.

2

Empty the contents of the packet into a cup with lid.

3

Secure the lid and shake well until all of the powder is dissolved.
Drink immediately.

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on age, body weight and medical condition of the patient.

Important Notice

Must only be used under strict medical supervision.

Suitable from 1 year of age.

Not for intravenous use.

For enteral use only (orally or tube feeding).

Preparation Guidelines

LIPIstart is typically mixed with water.

Preparation instructions are given by the dietitian or clinician.

The standard dilution of approximately 20 kcal/fl oz or 0.67 kcal/ml is made by adding 1 level scoop of LIPIstart (5 g) to 30 ml of water (1 fl oz). Use the scoop provided in the can or a gram scale for greatest accuracy.

Any prepared formula should be refrigerated and used within 24 hours. Re-shake before use.

Do not heat LIPIstart in a microwave as uneven heating may occur and could cause a burn. Do not boil LIPIstart.

Storage

Store in a cool dry place.

Once opened, LIPIstart powder must be tightly sealed and consumed within 4 weeks.

Pack Size

400 g (14.1 oz) can

Preparation Guidelines

Wash your hands and clean surfaces, utensils, and formula container.

Boil water and leave to cool for no more than 30 minutes to ensure it remains at a temperature of at least 158°F (70°C).

Measure out the required amount of water into the formula container. Do not use artificially softened water or repeatedly boiled water.

Using the scoop provided, add the prescribed number of scoops of LIPIstart to the water, leveling off each scoop with the back of a clean dry knife. Return dry scoop to LIPIstart can.

Seal formula container and shake well until powder is dissolved. Test the temperature before feeding. The formula should feel warm or cool, but not hot.

LIPIstart is now ready to use.

***Other dilutions and tube-feeding:** To be determined by the clinician or dietitian.

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on age, body, weight and medical condition of the patient.

Important Notice

Must only be consumed under strict medical supervision.

Suitable from 3 years of age.

Not for intravenous use.

For enteral use only.

Not for use as a sole source of nutrition.

Pack Size

30 x 16 g (0.56 oz) packets

Storage

Unopened: Store in a cool dry place.

Opened: Packets are designed for single use and should be used once opened. Any unused powder in an open packet should be kept in an airtight container, or sealed with a clip and used within 24 hours.

Preparation Guidelines

Sprinkle MCTprocal onto the desired food or drink and stir until powder is dissolved.

MCTprocal can be used in cooking and baking.

May be used to fortify enteral formula with a source of MCT.

Serving suggestions for MCTprocal are available on request.

Not suitable for addition to fruit juice.

Serving Suggestions

Skim Milk — Add the required amount of MCTprocal to warm or cold skim or low fat milk (as directed). Stir until dissolved.

Water — Add the required amount of MCTprocal to previously boiled warm water or cold water. Stir until dissolved.

Hot Drinks

- Tea** — Add the required amount of MCTprocal to a cup of tea and stir until dissolved.

- Coffee** — Add the required amount of MCTprocal to coffee granules, add previously boiled hot water. Stir until dissolved.

- Hot Chocolate** — Add the required amount of MCTprocal to hot skim or low fat milk (as directed) or previously boiled hot water. Stir until dissolved.

Low Fat Desserts or Puddings — (e.g. custard, rice pudding) Make up the pudding as directed. Sprinkle the required amount of MCTprocal onto the pudding. Stir until dissolved.

Low Fat Yogurt — Add the required amount of MCTprocal to yogurt (as directed) and mix until smooth.

Oatmeal — Mix the required amount of MCTprocal into hot oatmeal before serving.

Low Fat Soup — Add the required amount of MCTprocal to soup and stir until dissolved.

Mashed Potato — Sprinkle the required amount of MCTprocal onto hot mashed potato and mix well.

For more information on Glycosade, see page 74

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight and medical condition of the patient.

Important Notice

Must only be used in individuals with proven hepatic GSD where the use of long acting starch is indicated under strict medical supervision.

Suitable from 5 years of age.

Not for intravenous use. For enteral use only. Not for use as a sole source of nutrition. Glycosade may be given through a feeding tube. Not intended for use as a continuous enteral feed. Administer as a bolus to prevent possible tube blockage.

Storage

Store in a cool dry place. Packets are designed for single use and should be used immediately once opened.

Pack Size

30 x 60 g (2.1 oz) packets

Preparation Guidelines

Preparation to be determined by the clinician or dietitian.

For a recommended preparation as a drink:

1

Measure the required amount of liquid into a container with a lid.

2

Add the required amount of Glycosade to the container. Typically, a packet of Glycosade can be added to 120 ml (4 fl oz) of cold water or other suitable fluids.

3

Secure lid and shake until the powder is dissolved.

4

Glycosade is now ready to use.

DO NOT HEAT OR WARM GLYCOSADE AS THIS DESTROYS THE PROPERTIES OF THE STARCH.

The product should be freshly prepared and consumed immediately.

For more information on SOS25, see page 75

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight and medical condition of the patient.

Each packet of S.O.S25 prepared to a final volume of 200 ml gives a 25% carbohydrate solution.

Important Notice

Must only be given to patients with proven inherited metabolic diseases under strict medical supervision.

S.O.S25 is recommended from 10 years of age (can vary depending on individual requirements of the patient).

Not for intravenous use.

For enteral use only.

Not for use as a sole source of nutrition.

Storage

Store in a cool dry place. Packets are designed for single use and should be used immediately once opened.

Pack Size

S.O.S25 – 30 x 52 g (1.83 oz) packets

Preparation Guidelines

Preparation to be determined by the clinician or dietitian.

For a recommended preparation as a drink:

1

Empty 1 packet of S.O.S into a measuring cup with lid.

MAKE SURE TO USE FULL PACKET

2

Add the water to a final volume of 200 ml.

3

Secure lid and shake until the powder is dissolved.

4

S.O.S is now ready to use. Any prepared product should be refrigerated and used within 24 hours. Re-shake before use.

SINGLE DOSE AMINO ACIDS: DIRECTIONS FOR USE

Powdered Single Dose Amino Acids for use in the dietary management of inherited metabolic diseases of protein metabolism.

Product	Amino acid dose	Packet size
Arginine500	500 mg of L-Arginine	4 g
Arginine2000	2000 mg of L-Arginine	4 g
Citrulline200	200 mg of L-Citrulline	4 g
Citrulline1000	1000 mg of L-Citrulline	4 g
Creatine5000	5000 mg of Creatine	6 g
Cystine500	500 mg of L-Cystine	4 g
Glycine500	500 mg of L-Glycine	4 g
Isoleucine50	50 mg of L-Isoleucine	4 g
Isoleucine1000	1000 mg of L-Isoleucine	4 g
Leucine100	100 mg of L-Leucine	4 g
Methionine100	100 mg of L-Methionine	4 g
Phenylalanine50	50 mg of L-Phenylalanine	4 g
Tyrosine1000	1000 mg of L-Tyrosine	4 g
Valine50	50 mg of L-Valine	4 g
Valine1000	1000 mg of L-Valine	4 g

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight and medical condition of the patient.

Storage

Store in a cool dry place. Packets are designed for single use and should be used once opened.

Pack Size

30 x 4 g (0.14 oz) packets

Preparation Guidelines

To be determined by the clinician or dietitian.

Important Notice

Must only be used under strict medical supervision.

Not for intravenous use.

For enteral use only (oral and tube feeding).

Not for use as a sole source of nutrition.

Single Dose Amino Acids

For more information on Single Dose Amino Acids, see pages 76–84

Preparation Guidelines	
1	Measure out 2 fl oz (60 ml)* of water into a cup with a lid.
2	Add one packet.
3	Shake vigorously for 30 seconds.
4	Depending on the product, follow the relevant instructions below:

* 3 fl oz (90 ml) for Citrulline200 and Citrulline1000

Creatine5000	Valine50	Arginine500	Citrulline1000
Cystine500	Valine1000	Arginine2000	Isoleucine1000
Glycine500		Citrulline200	
Isoleucine50		Leucine100	
Tyrosine1000		Methionine100	
		Phenylalanine50	
	Product is now ready to serve. If left to stand, re-shake before serving.	Wait 1 minute, shake and serve immediately.	Wait 5 minutes, shake and serve immediately.
			Wait 10 minutes, shake and serve immediately.

KIDNEY DISEASE: DIRECTIONS FOR USE

Renastart™

For more information on Renastart, see page 87

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on age, body weight and medical condition of the patient.

Important Notice

Must only be used under strict medical supervision.

Suitable from 1 year of age.

Not for intravenous use.

For enteral use only (tube or oral feeding).

Regular monitoring of nutritional status and electrolyte levels is required.

Not suitable for use as a sole source of nutrition.

Preparation Guidelines

Renastart is typically mixed with water. Preparation instructions are given by the dietitian or clinician.

The standard dilution of approximately 30 kcal/fl oz or 1 kcal/ml is made by adding 1 level scoop of Renastart (7 g) to 30 ml of water (1 fl oz). Use the scoop provided in the can or a gram scale for greatest accuracy.

Any prepared formula should be refrigerated and used within 24 hours. Re-shake before use.

Do not heat Renastart in a microwave as uneven heating may occur and could cause a burn. Do not boil Renastart.

Storage

Store in a cool dry place.

Once opened, Renastart powder must be tightly sealed and consumed within 4 weeks.

Pack Size

400 g (14.1 oz) can

Preparation Guidelines

Wash your hands and clean surfaces, utensils, and formula container.

Boil water and leave to cool for no more than 30 minutes to ensure it remains at a temperature of at least 158°F (70°C).

Measure out the required amount of water into the formula container. Do not use artificially softened water or repeatedly boiled water.

Using the scoop provided, add the prescribed number of scoops of Renastart to the water, leveling off each scoop with the back of a clean dry knife. Return dry scoop to Renastart can.

Seal formula container and shake well until powder is dissolved. Test the temperature before feeding. The formula should feel warm or cool, but not hot.

Renastart is now ready to use.

***Other dilutions and tube-feeding:** To be determined by the clinician or dietitian.

For more information on Renastep, see page 89

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight, and medical condition of the patient.

Important Notice

Must only be used under strict medical supervision.

Suitable from 1 year of age.

Not for intravenous use.

For enteral use only (tube and oral feeding).

Regular monitoring of nutritional status and electrolyte levels is required.

Not suitable for use as a sole source of nutrition.

Storage

Store in a cool dry place. Refrigerate before use if desired.

Once opened, seal cap and refrigerate.

Re-shake before use. Discard any opened, unused product after 6 hours if stored at room temperature or within 24 hours if refrigerated.

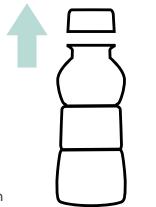

Pack Size

15 x 200 ml (6.7 fl oz) bottles

Preparation Guidelines

1 Shake well

2 Open

3 Drink

Shake well before use.
Best served chilled.

KETOGENIC DIET: DIRECTIONS FOR USE

For more information on K-Flo, see [page 95](#)

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on the patient's age, body weight and medical condition/ketogenic diet regimen.

Important Notice

Must only be used under strict medical supervision.

Suitable from 3 years of age.

Not for intravenous use.

For enteral use only (tube and oral feeding).

Suitable for use as a sole source of nutrition.

Preparation Guidelines for Oral Use

Shake well before use.

Best served chilled.

Serving suggestions and recipes for K-Flo are available on request.

Tube Feeding Precautions

If using a tube feeding pump, do NOT shake the bottle before administration.

Addition of foods or medications to tube feeding formulas may lead to tube blockages.

Storage

Unopened: Store in a cool dry place.
Refrigerate before use if desired.

Once opened: Seal cap and refrigerate.

Discard any opened, unused product after 6 hours if stored at room temperature or within 24 hours if refrigerated.

Pack Size

24 x 250 ml (8.45 fl oz) bottles

For more information on K-Quik, see [page 95](#)

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight and medical condition of the patient.

Important Notice

Must only be used under strict medical supervision.

Suitable from 1 year of age.

Not for intravenous use.

For enteral use only.

Not for use as a sole source of nutrition.

Preparation Guidelines

Shake well before use.

Can be incorporated into food, beverages, or an enteral formula.

Best served chilled.

Serving suggestions and recipes for K-Quik are available on request.

Storage

Store in a cool dry place.

Once opened keep refrigerated and use within 48 hours.

Pack Size

15 x 225 ml (7.6 fl oz) bottles

For more information on Fruitivits, see page 96

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight and medical condition of the patient.

Important Notice

Must only be used under strict medical supervision.

Suitable from 4 years of age.

Not for intravenous use.

For enteral use only.

Not for use as a sole source of nutrition.

Storage

Store in a cool dry place.

Packets are designed for single use and it is recommended that contents are used immediately once opened.

If a smaller dose size is required any unused powder in an open packet should be stored in an airtight container or re-sealed with a clip and used within 24 hours.

The product should be freshly prepared and consumed immediately. However, if this is not possible, all prepared products must be tightly covered and consumed within 4 hours at room temperature or within 24 hours if refrigerated.

Re-shake product before use.

Pack Size

30 x 6 g (0.21 oz) packets

Important Note: Household measurements are for a level unpacked measure and are approximations. Measure is tapped to remove air pockets and leveled off using the back of a clean dry knife. Results can vary significantly based on the individual, device, and/or method. The values Vitaflo provides are based on averages derived from multiple measurements. Vitaflo recommends using a gram scale for greatest accuracy. The scoop Vitaflo provides has been validated with Vitaflo products, so using it is preferable to household measurements.

VIA Education Hub offers healthcare professionals up-to-date resources to support the nutrition management of individuals with rare diseases.

In collaboration with experts around the globe, we provide product and condition-specific clinical resources, as well as programs for Continuing Professional Education (CPE) for Registered Dietitian Nutritionists practicing in the US.
